

# Invacare® Top End® T-5™ 70

- Description

The Invacare® Top End® T5 7000 Series Tennis Wheelchair is fast, light, strong and better than ever. 7000 series aluminum material, precision head tube design and axle securing system can improve your performance. Who doesn't want that? Material: 7000 Aluminum reduces the overall weight of the chair, making it comparable in weight with titanium frames without the high cost. The big advantage of 7000 aluminum is three-fold. One, the material is approximately 23% stronger than 6061 aluminum. Two, since the material is stronger, we are able to reduce the wall thickness of the aluminum tubes, reducing the overall weight. Best of all, the rigidity and strength of a 7000

aluminum frame is further enhanced by Invacare Top End's sophisticated heat treating and powder coating process. Design: The Invacare Top End design team continues to improve the multiple components on the T-5 7000 Series Tennis wheelchair. The head tube design includes precision components that maximize stiffness, reduce play and improve overall responsiveness of the casters, plus it is light weight. Axle receivers are locked onto the frame using the bolt securing system. This system minimizes axle play so that a player's rear wheels are secure and solid for a confident feel. Lastly, the sleek curved frame members adds a sharp look to the camber tube and swivel anti-tip. The Designer: Each T-5 7000 Series Tennis Wheelchair is custom built to each individual athlete's specifications and this process is overseen by Paul Schulte, our Engineering Manager at Top End. Paul who has been a member of the USA National Men's Wheelchair Basketball Team for years playing in multiple Paralympic Games and has held many MVP titles both as a junior and in the men's division of the NWBA. This guy knows what he wants in a court performance chair and has delivered so that you can get that, too. He works with our Team Invacare athletes to make sure that they are performing at their best. For ordering help, please refer to the FAQs which will lead you to our great help desk. The Help Desk has answers to most questions in one handy location and can guide you through the measurement process plus help you figure out the best options. If you have questions, please don't hesitate to click the "How to Buy" tab. We would love to help you.
