

# Invacare® Top End® Schulte

- Description

The Invacare® Top End® Schulte™ 7000 Series Basketball Wheelchair is fast, light, strong and better than ever featuring 7000 series aluminum material, precision head-tube design and an axle securing system improve performance to help you perform at your best. Who doesn't want that? Material: 7000 Aluminum reduces the overall weight of the chair, making it comparable in weight with titanium frames but without the high cost. The big advantage of 7000 aluminum is three-fold. One, the material is approximately 23% stronger than 6061 aluminum. Two, since the material is stronger, we are able to reduce the wall thickness of the aluminum tubes, reducing the overall

weight. Best of all, the rigidity and strength of a 7000 aluminum frame is further enhanced by Invacare Top End's sophisticated heat treating and powder coating process. Design: The Invacare Top End design team continues to improve key components on the Schulte 7000 Series Basketball Wheelchair. The head tube design includes precision components that maximize stiffness, reduces play and improves overall responsiveness of the casters, plus it is light in weight. Axle receivers are locked onto the frame using a bolt securing system. This system minimizes axle play so that a player's rear wheels are secure and solid for a confident feel. Lastly, the sleek curved frame members add a sharp look to the camber tube, anti-tips and offensive wing. The Designer: Each Invacare Top End Schulte 7000 Series Basketball Wheelchair is custom built to each individual athlete's specifications. This process is overseen by Paul Schulte himself, our Engineering Manager at Top End. Paul who has been a member of the USA National Men's Wheelchair Basketball Team for years playing in multiple Paralympic Games and has held many MVP titles both as a junior and in the men's division of the NWBA. He knows what he wants in a basketball chair and now offers the same performance to you. For ordering help, please refer to the FAQs which will lead you to our great help desk. The Help Desk has answers to most questions in one handy location and can guide you through the measurement process plus help you figure out the best options. If you have questions, please don't hesitate to click the "How to Buy" tab. We would love to help you.
